CLARESHOLM LOCAL NEWS

Claresholm Chautauqua, July 22 to 28

Mrs. J. B. Boose of Lethbridge visited friends here this week.

Mr. Jake Schumaker and wife left Friday morning for Banff.

Remember the Gladys Atree vaudeville performers at the Rex theater July 20.

A joint picnic will be given by the U. F. A. and U. F. W. A. on July 17th in Shaples grove.

Mrs. D. H. Ramage and children left last week for a month's visit with relatives at Innisfail.

F. Burton, of the Cardston News, was a fraternal caller at The Review office on Thursday.

Miss Helen Butts is home on her holiday from the training school of the Holy Cross Hospital, Calgary.

Mr. and Mrs. J. T. Kingsley left last week for a month's motor trip to the coast and through the western states.

See Pola Negri in "Forbidden Paradise" at the Rex theater on Friday and Saturday night this week. From the stage play "The Czarina".

All who are members of the Rifle Association are requested to be at the G. W. V. A. club room, Tuesday, July 16, from 7:30 to 8:30, for the purpose of being attested.

A. E. Rampions will hold a pick-up sale at Vaughn's livery barn on Saturday afternoon, July 18. Cattle, horses, machinery and farm machinery listings may be made with R. E. Moffatt, clerk.

Mr. and Mrs. O. L. Reinecke and daughter Arline left the first week in June for a month's vacation on the coast, being given by the coast route. They will also visit several western states. They expect to be gone about a month.

A million dollar crop was blanketed Alberta on Monday. At Claresholm rain all night, the ground being about one inch. It was doubly welcome for the reason that two weeks of dry weather was causing much anxiety.

Messrs. Norman and Reg. Lambie, Miss Alice Lambie, Miss Veanna Butts and Miss Edna, having left Thursday for Calgary, Banff and on the Wednesday road through British Columbia. They expect to be gone a month.

A baseball tournament will be held at Claresholm on Wednesday afternoon, July 15. Carman, Galt, Lethbridge and the host will play. There will be a dance at night in the L. O. O. F. Hall. Proceeds above prizes to go to the covered grand stand fund.

Major G. H. Schoof returned to Claresholm last Saturday. He reports a successful lecture series in the Stratford. For the two weeks preceding his return he had been at Jasper National Park on patrol, and is now arranging for a patrol of the Waterton Lakes and Crows Nest districts.

John F. Miller, sight specialist of Calgary, who has made previous visits to our city for some years, left June 13th for a tour through eastern Canada. European countries and the eastern states. He is expected to return about September 1st, when he will resume his visits as usual.

Judge Hale, who will appear on the Chautauqua. He is a dynamic character with a worth-while message.

Eileen Hoff, prima donna—the girl with the golden voice—will appear at Chautauqua on the closing night.

Canadian Pacific Crop Report

Winnipeg, July 6.—The weather during the past week has been most favorable for the grain crops of the west according to the weekly crop report issued today by the Canadian Pacific Railway agricultural department.

Temperatures were considerably higher with local showers in many sections. With the exception of unusually favorable crops over the west are uniformly good and fields are showing excellent color and heavy stand. Livestock is doing well and putting on flesh and doing well in general with good returns. Increased prices for hogs and hog products have stimulated more farmers to again increasing their breeding stock.

In the province of Alberta, the crop outlook continues quite promising and weather conditions during the week have been favorable for growth. The province is in a favorable position to have a bumper crop this year, probably ten days. Seeding of all grain fields has been completed and farmers are busy summerfallowing.

General conditions over the Edmonton, Dunvegan and B. C. area are good, in fact they have not been better for many years.

Taking the province of Saskatchewan as a whole the crops were never more promising although in some districts a percentage of the grain is still under water. Hot dry winds have depleted the moisture supply in some southern sections.

Alberta Women's Institutes to Have Exhibit at Toronto

Alberta Women's Institutes has accepted the invitation issued by the National Exhibition Association of Toronto, to present an exhibit which will feature fruit and vegetable products of Alberta for which they desire the cooperation as much as possible of all the citizens and the Women's Institutes of the province of Alberta. The exhibition will be held from August 24th to September 5th. All Alberta exhibits should be in Edmonton by July 15, at the provincial seed grain plant, 2627 105A Avenue. Edmonton. Carriers will be sent to M. McMillan, for transportation to Toronto. The southern districts have been made responsible for canned and preserved fruits and general meat in preserving jars of Alberta manufacture. Further information can be got from Msr. C. Lynch, Staunton, Lumberck, Alberta.

NOTICE OF SALE

Notice is hereby given under Section 48 of the Domestic Animals Act (Municipalities) that a brown steer, about 2 years of age, white face and tail, white-streaked feet behind, no visible brand, was impounded in the pound kept by Charles Wilson, located on the back of lot 1 in Block 13, 1st Plat 1472, Claresholm, on the 26th day of June, 1925, and that the animal was sold on the 25th day of June, 1925, to Charles Booth, of Claresholm, and that the said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.

Claude J. Anundsen,
Surveyor, Town
Municipality of the
Town of Claresholm.

Don't Get Sunburned

A light application of Nyal Face Cream before exposure will effectively prevent sunburn, tan and skin irritation. This delightfully refreshing cream also soothes and heals inflamed skin, dries in quickly leaving no trace and makes face powder adhere better.

Canada's Tied-Up Resources

Parliament, the railways, the Canadian Manufacturers' Association, labor unions, and public bodies generally, are still struggling with the problems involved in finding a remedy for the lack of population, recurring periods of unemployment, and slowness of development and prosperity in Canada. That there is something wrong somewhere, all admit, but no two groups are agreed as to the cause of this difficulty or to a general solution.

The failure of the national immigration in order to overcome the lack of population without which it is difficult to attain the natural resources of the Dominion cannot be denied. It is also urged that in the matter of railways, manufacturing industries, and national equipment of all kinds, Canada is not equipped to meet a population of 100,000,000, and that, until there is a large permanent population, no railways can hope to fill capacity, nor can industries be fully manned and operated the year round. Thus we have advanced a wide open door policy in immigration.

Labor Unions combat this argument and declare that so long as men are out of employment so many months in the year because they cannot get work, immigration should be further restricted rather than increased. They claim that the Canadian market is too small to absorb the surplus population, and that, in order to meet the needs of the market, a large immigration should be so improved here as to provide adequate employment and thus stop the exodus of thousands of Canadians annually to the United States.

The manufacturers have their own pet solution. They say that the Canadian government, its natural resources, and its tariff protection; in other words, the Canadian market, are too small to absorb the surplus population of the British Isles and the United States. They argue that if this was done, there would be employment for all Canadian artisans and workers, but, they contend, they cannot compete with the United States and British manufacturers. Despite these statements and assurances, the fact remains that Canada's present population is too small to absorb the output of its industries, and no immigration can hope to increase necessarily with United States and British manufacturers in world markets.

There is, however, a basic reason for Canada's economic difficulties and lack of natural resources—namely, the wealth and variety of its natural resources, but unfortunately nobody has the courage to frankly state the difficulty on the floor of Parliament or in open convention of the organizations to which reference has been made.

On more than one occasion in the past the statesman has been made in this column that the chief ground of complaint against the Canadian manufacturer is the smallness of the market he has to offer. The tariff protection has been in existence for many years, but it has not been used to the selling price of his goods in the Canadian home market. Instead of using it, Germany, United States and Japan have used their protective tariffs, to develop their natural resources for use at home and abroad. The Canadian manufacturer has followed the line of least resistance and has given up his natural resources to the United States which by a little initiative and enterprise and the investment of capital on the part of the Canadian manufacturer, could have been produced in Canada, thereby providing employment, keeping capital at home, reducing costs of manufacture, and reducing the adverse balance of trade as between this country and the United States.

The reason Canada's present population is so small despite the great efforts put forth to attract immigrants; the reason why factories are not badly engaged and may staff all the year round; the reason there is an annual exodus of Canadians to the United States; the reason there is unemployment; the reason why immigrants are not willing to stay here, is to be found in the fact that we have lost control of the natural resources of the land. The natural resources which were once available and now still dormant, undeveloped for use, and most remarkable of all, are now to a great extent held up so that their development in the near future is precluded by the out of the question.

In the next article I appear in this column explanation will be made of the reasons for the decline and outlining what is considered to be the most serious situation confronting the Dominion and its future, and one which, unless our Federal Government and those of the Provinces which have control of their own resources loses neither time nor courage in dealing with, may result in ultimately breaking the Dominion.

Antique Wallpaper

Antique wallpaper, 250 years old, will be used on the walls of a room being built in the English furniture galleries at Somers' Antiques, Mississauga. The room will be a reproduction of a 17th century apartment and will contain furniture made at or about the time when Queen Anne died. The wallpaper has been taken from a room in an old house in Somers, where it had hung for two centuries, a room that has been used for centuries, a room that has been used for two centuries.

Canada Enters Butter Competition

A butter competition open to the world will be held at the Canadian Agricultural Show in New Zealand. A sample of Canadian butter will be sent from Etobicoke, Denmark, the United States, Canada, Australia and Peru have been received. Experts state that New Zealand has a good chance of holding the championship.

Prince Edward Tenpence

The Prince of Wales' new halfpenny coin has been issued in the British colonies for half an hour in the cotton growing areas of Nigeria. Senior railway officials there presented him with a special coin to mark the occasion. The coin is a reproduction of the one issued in 1902 by King Edward VII.

For Sprains and Bruises. There is a new sprain and bruise ointment than Dr. Thomas' Elixer of Oil. It will reduce the swelling that follows a sprain or bruise. It will draw the skin and draw the pain. It will take the ache out of a bruise by counteracting the pain of the bruise. It will cure any sprain or bruise.

Mountain peaks 1,650 feet high have been discovered under the sea, 100 miles off the coast of California.

Has Fairly Good Record

League of Nations Gains Ground Although Facing Difficulties

Professor Stephen Leacock, of McGill University, is reported as taking a rather pessimistic view of the probabilities of the League of Nations' present condition. When he was a strong adherent of the League of Nations he declared that he had no confidence in it as constituted today. Considering what Europe was like before the League was formed, he was sceptical about the league when it was formed six years ago and the difficulties which it has had to contend with, it is remarkable that the league has survived. He believes that life there is hope. And the league has a fairly good record of achievement to its credit.

There are enormous difficulties still in its way, but what has been done so far should inspire faith in the future and greater efforts to see that the ground already gained is not lost.

Agricultural Possibilities Of The Canadian Northland Are Now Being Demonstrated

Steadily data are being accumulated regarding the agricultural possibilities of the Canadian Northland. Year by year the reports of the Dominion government show that the limits of possible production extends for nearer the Arctic Circle than was at one time taken for granted. The latest official departmental commentary on this subject is the report of the Royal Commission on Agricultural Production, Fort Vermilion, Alberta, for 1922. The Fort Vermilion is farther north than any part of Ontario, and at times the temperature there has been known to drop 20 degrees below zero. The mean temperature during the crop season ranges from 6 to 10 degrees lower than during the same months at Ottawa.

What particularly interests the agriculturists from May 1 to mid-September are the snows on the prairies. At the rate of from 25 to 30 bushels per acre, the reserves of snow are so great that they were even more remarkable. They show that, in the northern regions, early deep planting produces the best results. The seed was planted from May 1 to May 15, when the average yield was 430 bushels per acre. Bushes of 430 bushels per acre, bushels of 430 bushels per acre.

One variety of garden corn produced a fair yield, and early-maturing bush beans were quite successful, and a large number of other common vegetables produced excellent crops in a very short time. In fact, the short season between the date when they became fit for use is a striking feature of the rapid growth in the north country, made possible by long hours of sunlight. This yield of bush beans for storage was obtained while the growing period was favorable for hay and a heavy crop harvested.

These results are obtained under more favorable conditions and by better cultivation than is generally found on farms. Yet they distinctly show that there is a great field for the northern extension of agriculture.

Knew What He Was Doing

McDermott's Advice

A south-bounder by name, and his first job consisted of driving one of the pony teams used for carrying the coal to the elevators.

He got along very well indeed until one day he came to a place where he had to wait for a team to tow in the heavy pony to the pens. Consequently, he took a pony and commenced to back away part of the time.

Immediately a furnace came on the scene and asked what he was doing. The lad replied that he was making a way for the pony to pass. "Now, that's a very dangerous thing to do," said the man. "You might be hit by the wheel, or you might be hit by the road, or you might be hit by the floor. What you ought to do is to cut the floor."

"Dive! I'm a fool," retorted the lad. "It's the pony's head that went through—not his feet."

Wool Growers Sign Contracts

Saskatchewan and Manitoba Growers Sign Up With American Wool Growers

Wool growers in Saskatchewan and Manitoba have signed two or many contracts this year at the same time as the year of 1922. Mr. J. H. Fisher, former British minister of education, who has just returned from a tour of the United States, said: "It is encouraging to see the number of contracts signed by the wool growers in Canada. Mrs. William Dennis, of Halifax, and Mrs. Rose, of Vancouver, took an important part in the discussions.

British Columbia Is Developing Rapidly

C.P.R. Officials Very Much Impressed

With Existing Conditions

After spending ten days on the Pacific coast, the officials say, coming from the same or a sound business activity noticeable there, British Columbia is launching into an era of constructive development which augers well for her future prosperity. "We will see great progress in the Canadian Pacific Railway, Montreal, prior to leaving Vancouver on the coast.

Montreal, New Westminster and Victoria are all showing the direct benefit of the large number of important enterprises now in progress on the coast. Mr. H. H. Hall, president of the Canadian Pacific Railway, has just returned from a tour of the coast cities during the next three months.

Vanuver Island, the vice-president of the Canadian Pacific, is continually attracting more and more attention throughout Eastern Canada and the United States as the playground of the Pacific coast. The Canadian Pacific's extensive railroads later in the month should do much to increase this interest and materially augment the flow of tourists' traffic across Canada and through the coast cities during the next three months.

Admirable scenes of this series which are to be had in the same revised form, are the Nootka, No. 72; Mount Mountain, No. 76; Moose Jaw, No. 68; and Regina, No. 112. It is expected that the Yorkton sheet will be issued in a few months.

New Western Road Map

Sectional Map Shows Features of the Canadian Rockies

The topographical survey in Canada, department of the interior, Ottawa, has just issued the Qu'Appelle sheet of the sectional map of Canada. One town and three lakes are shown on this map, data already being issued, but this is the eighth sheet of this series which shows the topography in a complete form.

On this sheet the outstanding feature is the dry valley of the valley. There are six large lakes in this section of the Qu'Appelle River shown. Roads are divided into four classes. The inter-provincial roads from Winnipeg, Brandon, Portage la Prairie, Indian Head and Fort Qu'Appelle to Regina, Calgary and the Pacific coast is a class 1 road and is shown in red. Class 2 roads, such as Melville to Qu'Appelle, are shown in blue. Class 3 roads, in yellow, are the roads leading toward other centres of population. Class 4 roads shown by a solid black line are well travelled local roads, which act as feeders to the first two classes. The 100 miles of roads shown in red are roads shown in broken black line, which are used for vehicle traffic, but are generally little used and in poor condition.

Admirable sheet of this series which are to be had in the same revised form, are the Nootka, No. 72; Mount Mountain, No. 76; Moose Jaw, No. 68; and Regina, No. 112. It is expected that the Yorkton sheet will be issued in a few months.

Doing Good Work

Canadian Colonization Association Successful in Setting Many

Means of Arousing Interest in Work of Victorian Order of Nurses

The value of newspaper advertising as a means of arousing interest in the work of the Victorian Order of Nurses was emphasized at the annual meeting of the board of governors of the Victorian Order of Nurses, which was held at Ottawa recently.

The gathering was presided over by Mrs. Robert Reid, of Montreal, and representatives attended from all over Dominion. Special attention was paid to the question of the value of newspaper advertising in the work of the order, of which this organization has been working steadily in helping new settlers to the west under the auspices of the Canadian Pacific Railway.

It was decided that the order's activities in Canada, Mrs. William Dennis, of Halifax, and Mrs. Rose, of Vancouver, took an important part in the discussions.

A Land Of Schools

America's Credit Is Education Says Former British Minister

America is a land of many changes and we are, indeed, all Americans before we are citizens of any one country," said Mr. J. H. Fisher, former British minister of education, who has just returned from a tour of the United States.

On his return from a tour of the United States, Mr. Fisher said: "I am greatly impressed by the educational system which gave Europe its civilization," he said. "Now sprouting the North American continent with schools and colleges in rapid profusion. The sums put into education in America are staggering. The educational system of America is the most astonishing library that has ever existed. The idea of a free, full-time, secondary education for all its citizens, "

"Declares Earthworms Sing

Can Be Heard Twelve Yards Sings German Zoologist

Earthworms sing loudly enough to be heard twelve yards away, and their frequent song is a sure sign of a healthy, struggling, redundant of jazz, reports a zoologist of Freiburg, in publishing his observations. The investigator compares a worm with the person who is always in a bad humor, and with a bad name. He is interested in learning his investigations of the worm's vocal organs.

Canada's Foreign Trade

Recent figures compiled show the value of Canada's imports from all countries for 1922 to be \$7,953,640,407, compared with \$8,535,588,681 for 1921, making a decrease in value of \$88,934,274. The value of Canada's exports for 1922 is \$1,692,551,749, compared with \$1,663,535,665 for 1921, making an increase in value of \$28,589,084 for 1922.

Genesee Supply

"I certainly got a bargain when I bought my radio set," remarked young Smith.

"I am quite sure of that?"" questioned his wife. "There's no doubt about it," was the answer. "After I had assembled the set I had 67 parts left over!"

Women wash clothes when they are angry; silent tears mark the deepest grief.

Women never waste their time washing greasy foods.

An Eastern Editor

Vincent Dulhun, Director of the C.W.N.A. for Quebec, and Procurator of Le Progrès de Saguenay, Chicoutimi

He will attend the Canadian Weekly Newspapers Association Convention at Winnipeg, on June 24, 25 and 26.

Strong For Confederation

Inhabitants of Labrador Would Favor Confederation With Canada

Consideration with the Dominion of Canada as a means of solving some of Labrador's chief problems, was advocated by Dr. W. T. Grafton, of the Labrador fame, who arrived from the ocean recently.

"I have come to this conclusion," he said, "after a long stay living with the Indians of the Labrador."

He said: "The people of Labrador are 100 per cent strong for confederation and it is my personal opinion

that Labrador would be better off as a part of the big confederation. At present, the people of Labrador are not without a voice in any country."

Dr. Grafton's new hospital ship, the *Anthony*, manned and staffed by voluntary workers from various parts of the country, will be in the Atlantic on his return.

On his trip around the world was in the nature of a furlough in celebration of his 60th birthday.

The ship, a 100-foot long, 30-ton boat, will sail on the Labrador coast, in the big fishery, on Grafton's programme for the present year.

Decrease In Exports To U.S.

Trade Balance For April Was Unfavorable to Canada

Canadian exports to the United States were down in April and the trade balance in that month was unfavorable to the Dominion. In a statement issued by the Dominion bureau of statistics, it is shown that Canadian exports to the United States of \$23,344,000 were exported in April, while imports from the United States for the same month were \$20,561,629, entered for two to ten months, and \$2,745 entered for one month.

On April 30 imports of \$30,561,629, entered for one month, and exports to the United States for the same month were \$29,231,254, and imports from that country \$1,057,740,253.

Farming At Brandon

Farmers Are Taking Great Interest In New Industry

For farming in the Brandon district there is a growing industry. Many farms are being cleared and broken and are being taken on a small scale to experiment with the animals.

Last year George H. Bradley dug out and raised 47 red foxes, 22 wolves and a number of smaller animals. He has raised several litters of black foxes, besides the red ones which he has captured.

Gold Prospectors Go North

Early summer will see some scores of gold prospectors leaving for the north country, where they will range the valley of the Blood River, approximately 1,000 miles north of Edmonton.

After Masengni had written "Canaliers Russes," he threw it into the fire, but his wife rescued it.

Saskatchewan Growing

Nearly 15,000 Immigrants Came to Province in 1924

With a total of 14,955 immigrants coming to Saskatchewan during 1924, the record for the past ten years, the record for the past ten years was broken, according to statistics of the Canadian government.

Immigration to the Canadian prairies has increased from 1922 to 1924.

Rocky Mountain National Park

The season of 1922 saw more than 100,000 visitors to the Rocky Mountain National Park, according to figures recently made public. This was an increase of about 20,000 over the previous year.

After Masengni had written "Canaliers Russes," he threw it into the fire, but his wife rescued it.

Monarch Of All He Surveys

One of the kings of the monarchs held at Wainwright Park, on the Canadian National Railway east of Edmonton, is the monarch of all he surveys.

He is a male, who is the only one of his species to be found in the prairies.

Success In Western Canada

In a recent issue of the Calgary Alberta, Miss. C. G. (21) goes about her work with a smile on her face and determination to see what can be done in Canada, and says that she had no profit from her Canadian farm of about \$1,000 for her first year's losses.

Colored Boy — "I Want Some Sulfur Powder."

Dringoli: "What kind of powder?"

Colored Boy: "Dumb boy! I want some powder that you put out in one glass and some in another glass."

Dringoli: "I don't know what you want."

Colored Boy: "I want some powder that you can eat up and be a

The Flour Milling Industry Has Expanded Remarkably During The Past Few Years

Agriculture and Business

The Present Business Situation Is Normal and Healthy

Agricultural and business conditions during May and June were, while not satisfactory, than a year ago. The reports received from various parts of the Dominion show that seed has been carried out under favorable auspices, and the grain crop is in a good way, and a good yield. Both the wholesale and the retail trade are still being conducted on a conservative basis, but apparently there is a good deal of activity in the grain market, which, while not very large, has been brought about by the introduction of British capital, which is gratifying in view of the fact that, in the first place, of the capital invested in Canadian flour milling was Canadian.

At the end of 1922 there were 560 flour mills and 823 grist and meal mills in Canada, with a capacity of 1,286,000 barrels per year, or an average of 1,000 barrels per day.

On the whole, the business is progressing well, and the market is healthy, and the more so, as the more the market is healthy, the easier it is to get a good yield. Both the wholesale and the retail trade are still being conducted on a conservative basis, but apparently there is a good deal of activity in the grain market, which, while not very large, has been brought about by the introduction of British capital, which is gratifying in view of the fact that, in the first place, of the capital invested in Canadian flour milling was Canadian.

Fall Elections Seem Assured

Ottawa, July 8—A general election this fall now seems assured. The election seems assured since the session strongly suggests its probability, even though no official decision has been reached. Everything, however, appears to be shaping up for a general election.

Gladys Attre Dancers Coming

Gladys Attre Dancers and vaudeville performers to the Capital. The Gladys Attre Dancers, producers of the famous fantasy "Twinkle-Toes" to the Calgary Exhibition, will at the Rex theater, Clareholm, on Monday, July 20. The Gladys Attre dancers are from the famous 45 piece, famous all throughout western Canada. Be sure to go to the Rex theater on the 20th and see a real first class vaudeville show. Come home here on their own merit and no guarantees are attached on your part in order to get them here.

Popular prices and money refunded if they do not come up to your expectations.

Remember, Monday, July 20. One night only.

Bethel United Church

"The Care for Can" will be the pastor's theme at the morning service at 11 o'clock next Sunday, July 12; a message from the Gospel for worried or discouraged folk.

Wednesday school, with classes for those of all ages, meets at 12 o'clock, noon. You will be welcome.

In the evening at 7:30 the pastor will speak about "The Man Who Cares"! A gospel message for today.

During the hot Sundays of the summer these services will be made brief, practical, and helpful.

There is Welcome, Worship,

and Work in this church for you.

A special welcome for newcomers and visitors.

Prize Lists

Teachers and pupils preparing exhibits for the school fair are requested to note that the following classes of exhibits have been added to the list. They will be competed for as collections from the school, not individual pupils. First prizes \$2.00, second prizes \$1.00.

1. Best collection of noxious weeds mounted and named.
2. Best collection of plants mounted and named.
3. Best collection of insects.

5000 Facts About Canada

"5000 Facts About Canada" is famous as a rich storehouse of information about the Dominion. It is the product of the work of the recognized authority in this country as a writer and lecturer. The 22nd annual edition is out for 1925, and will, as in former years, be welcomed by many. Fifty pages from "Agriculture to "Yukon" include a series of striking facts presented in a crisp, terse form that fastens them on the mind. The 1924 issue contained many new sections, including a striking comparative table of our national growth during the quarter of a century since 1900. The book may be secured at any good dealer, or by sending 5 cents to Canadian Facts Publishing Co., 588 Huron Street, Toronto. He who would know Canada will find this wonderful little book a means to that end.

NOW everyone, anywhere, can have the conveniences and savings of electric light and power. This new Delco-Light plant is offered at an amazingly lower price than any Delco-Light plant was ever offered before. It can be bought on terms so easy that no farm family need be without the wonderful benefits of electricity any longer.

A Revolutionary Low Price

This new Delco-Light plant is a genuine Delco-Light—backed by the satisfaction of over a quarter-million Delco-Light users. It is a non-storage battery plant, equipped with a standard Delco starter and an economical starting battery. It has full 5000 watts capacity, starting and load, economical in operation. And its price is only \$255 f.o.b. Toronto—the most sensational price and the most startling value ever offered in a Delco-Light plant.

Made Possible by Delco-Light

For months we have been working on the development of this new Delco-Light. Our years of experience as the world's largest

manufacturers of farm electric plants have enabled us to design a plant which will give dependable electric light to any home. And our enormous manufacturing facilities enable us to build this plant at the lowest possible cost and to sell it at an amazingly low price.

A Small Down Payment—
Balance on Easy Terms

This new Delco-Light Electric plant can be paid for on terms so easy that anyone can take advantage of them. Even though the cost is only \$255 f.o.b. Toronto, you need make only a small down payment.

Never before has such an opportunity been presented. Never before has Delco-Light come to light and been so easy to buy. It means that any farm home—your home—can have Delco-Light today.

Send Coupon Immediately

Write immediately for full details of this remarkable offer—specifications of the plant and figures which show how easily you can get this great convenience. Sign and mail the coupon now. It puts you under no obligation.

WORLD HAPPENINGS
BRIEFLY TOLD

Germany's reparation payments through the office of the agent totalled \$1,000,000 last month.

The Free State Government has decided to take part in the movement for re-opening Ireland as a tourist resort.

A total of 589,254 spectators, 150,681 of whom were deadheads, attended the Olympic Games last summer, according to official figures.

The Hon. Harry Cookshank, lieutenant-governor of Ontario, has been elected director of the Canadian Pacific Railway via Sir Edmund Osler, deceased.

The Hon. Baron Macdonell, of Sandford, died June 9 in London, aged 81. He will be remembered chiefly for his tenure of office as under-secretary for Ireland from 1902 to 1908, when he was Sir Anthony Macdonell.

On the recent report emanating from Paris to the effect that a number of young Germans were enroute to Mexico to become officers under Abel-Edel-Krueger, his war against the French.

General James A. Lovell, American observer of the League of Nations commission in Paris, has resigned for "personal and business" reasons, and his resignation has been accepted by Secretary Kellogg.

The Latvian Legion has passed a law forbidding the sale of alcoholic drinks at educational institutions, at theatres, exhibitions, etc. In provision shops, on board vessels in inland waters, on railway trains and in restaurants.

With unspent speed, the Belgian Government informed the state department, Washington, that it would send a commission the latter part of July to negotiate a judicial settlement of its debt to the United States.

Complaints at Sing Sing who can afford it are permitted to have radio apparatus in their cells. About a dozen have taken advantage of the privilege to have whole sets installed and some sixty others have had extension pieces connected with these sets.

T. D. Brown, K.C., of Regina, has been declared elected to the one vacancy on the senate of the University of Saskatchewan. Mr. Brown, which was not filled by appointment this year, he defeated J. E. Bryant of Regina, and will represent the city of Regina.

For Irish home industries interested in the last budget, the Free State finance minister, accordingly as an experiment to see whether it worked and whether it warranted a permanent place in the government's policy, is said to have proved successful.

Decrease In Drug Addicts

Medical Care Instead of Prison Term Is Advocated

There has been a slight decrease in the number of addicts in Canada in the last two years, according to a paper prepared by F. W. Cowan, superintendent of the federal health department of Ontario, and read by Chief W. C. Gandy, of Ottawa, on June 11, at a session of the 21st annual convention of the Chief Constables' Association of Canada.

The paper contradicted the common belief that the number of addicts has increased every year. Narcotic drugs tended to make the addict, if he turned to crime, a criminal of the sneak thief type, and not of the aggressive highway type. The number of young women who have become addicts was on a fairly steady decrease.

Mr. Cowan advocated medical care and treatment for the addicts rather than prison cells.

Cost of Shipping Important

Information About B.C. Mines Wanted By British Capitalists

It is not enough to tell that you have minerals in your province, tell us how it will cost to get them to the market. That is the declining factor in the development of all provinces.

In these words Sir John Davie, of the mining and oil company, the leading international oil and gas concern of the British Columbia chamber of mines, of the most effective method of bringing British capital into the development of the British Columbia industrial resources.

Wheel Chair Tourist

James Thompson, an invalid in 10 years, is propelling his way across the continent from Coeur d'Alene, N.M., to New York, in which he will arrive in October. He is wheeling his chair on the American, 21,000 miles, 35 miles a day with the assistance of lifts from trucks.

From Down-By-The-Sea

Timeline Poison Gas

Canada Favors Idea of a Conference To Be Held At Washington

Canada at Geneva rallied in the idea of a conference to be held in Washington with a view to outlawing the use of gas in warfare. The Canadian government has been advanced by Dr. E. Burton, the United States representative at the present conference on the control of arms. Canadian delegate, Dr. W. A. Ridell, supported the proposal of Dr. Burton. He repeated the fact that it is the Canadian government, the First Canadian division, who introduced the first sheet of poison gas when it was projected from the German tanks at Ypres in 1915. The Canadian government has no objection to Canada's interest in any movement that would have for its aim the suppression of this method of waging war.

Thrust by eloquent appeals from Mr. Burton, the Canadian delegation, at a memorial session, went on record in favor of the immediate framing of a special protocol by which the use of asphyxiating gas in war thus heretofore would be outlawed.

The protocol will be open to signature by all nations.

Mr. Burton laid stress on the urgency of this proposal, which defined now a regular conference to be held in Geneva to regulate poison gas warfare. But he said that if this was found impossible, it was authorized to announce that the Canadian government of the United States would be highly esteemed an invitation for the convening of a special conference in Washington.

War Widow Receives Long Missing Locket

Kerpane Worn By Husband in War Returned to Winnipeg Woman

A little gold locket, pathetic in its broken condition, and still bearing verdigris from years of exposure, the heirloom of Frank and Anna Karpene, who lost their home in the Nov. 10, 1916, fire at Winnipeg, has been returned to the wife.

Frank Karpene, a 19-year-old boy, the baby girl is eight years old, and the father who was the locket joined the ranks of the heroic firemen who fought the blaze at the home of Mr. and Mrs. J. S. Bevan of Winnipeg, and encircled the snapshots of her husband and son. The locket was found in the debris of the house.

Mr. Karpene, a policeman again, the locket is gone and the photographs are stained and weather-worn. The baby girl is eight years old, and the father who was the locket joined the ranks of the heroic firemen who fought the blaze at the home of Mr. and Mrs. J. S. Bevan of Winnipeg, and encircled the snapshots of her husband and son. The locket was found in the debris of the house.

Mr. Karpene believes that traffic over the government railway will not be difficult. To oblige any danger, he will not place the placard in the effect that the odd days of the month would be reserved for northbound traffic and the even days for southbound. Each car would be required to carry a light advertising sign to provide for the reader.

The investment on the part of the railway company, in flanger lines, track stretching gear, etc., might be negligible, declared Mr. Karpene, when compared with the increased revenue from freight cars to different points along the Hudson's Bay line.

Mr. Karpene has complete confidence in the feasibility of the scheme and maintains that the northbound traffic would ultimately become the mecca of sport lovers and attract more tourists to the great adventure of the Canadian National Railways.

The line could be placed in the railway producing class as the "World's Most Unique Motor Highway," he contended. Mr. Karpene proposes to submit his idea to the railway authorities.

Monoplane Tops Over

A monoplane operated by the Faraday Aeroplane Corporation, carrying three passengers and a crew of two, was flying over when it made a landing at Fort Ball, Alberta. The plane was enroute from Fairbanks to Nome.

The machine turned over, but no one was hurt, and the passengers continued their journey down the Yukon River by狗 sleds.

American Born Canadians

According to the figures of the last Canadian census, there are 274,924 Americans in Canada who were born in the United States, while 275,494 are naturalized Canadians. Of the total of American born, 24,066 are to be found in Western Canada.

The income tax has been abolished in Saskatchewan.

To Locate At Winnipeg

Residence of Board of Grain Commissioners to Be Changed

The residence of the board of grain commissioners was changed from the hotel of the Alice in Winnipeg when the agriculture committee of the House of Commons enacted the residence clause in the Canada Grain Act. There was considerable discussion and a majority of the committee favored the change.

Hon. Dr. R. J. Marion, Conservative, Prof. William, protested strongly against the recommendation to move the board of grain commissioners from the Alice in Winnipeg. He pointed out that Winnipeg was only an exchange and that grain was only inspected there. At the head of the lakes, however, stated Dr. Marion, grain is weighed, stored, handled, trans-shipped and finally inspected into boats.

Hon. W. R. Mothewell, minister of agriculture, disagreed with Dr. Marion, and said that the place chosen for the location of the board of grain commissioners was at Winnipeg. Mr. Mothewell declared that ninety per cent. of the disputes occurred in Winnipeg and that the place chosen was the only sensible place he could find.

Hon. A. C. Green also took issue with Dr. Marion. The only sensible place, he contended, for the board to be situated was at Winnipeg.

Auto Plane Is New Racer

London Has a Hybrid Craft to Try For Speed Laurels

A Nightgown That Is Practical As Well As Fancy

Almost every home owner delights in making her own dainty undergarments. There are so many beautiful designs that it is difficult to find the right material, whether to be fine material, such as silk, or such as crepe or crepe-de-chine. The given illustration is very easily made. It may be made of any fine material and arranged on short sleeves and a belt with a button in the center. A bertha which may be all over lace is a more trim arrangement. The pattern is made in sizes 24, 26, 28, 30 and 32 inches. Medium size requires 2½ yards of 36-inch material and 1½ yards of 36-inch material, both with bertha; 3 yards more with bertha.

By Motor To Hudson Bay

Unique Plan Proposed To Use Railway Lines For Motor Cars For Tourists

A procession of motorists driving the pleasure-seeking motorists on their own family motor cars, fitted with flanges to grip the rails of the Hudson's Bay line, is the ingenious scheme proposed by H. M. Haultain, local construction engineer of Winnipeg.

Mr. Haultain believes that traffic over the government railway will not be difficult. To oblige any danger, he will not place the placard in the effect that the odd days of the month would be reserved for northbound traffic and the even days for southbound. Each car would be required to carry a light advertising sign to provide for the reader.

The result of this ruling is that the right exercised from immemorial days of travel crossing the border freely has been lost.

Following the United States announcement, W. E. Ditchburn, Indian commissioner, wired Ottawa, and pointed out how serious the embargo would be on the northbound traffic.

Mr. Haultain's suggestion and the resolution to be taken in Ottawa and representations made to Washington.

U.S. Bars Canadian Indians

New Ruling Series to Those On Coast Reservations

Transportation officials at Victoria were surprised by an announcement from United States immigration officials that all Indian inhabitants of Canada were to be denied the right of entry into the United States.

It was stated that Indians not eligible to American citizenship, and, therefore, not admitted to the United States. It was stated that intimation of the new order from Washington had come through the Canadian commissioner of immigration in Seattle.

The result of this ruling is that the right exercised from immemorial days of travel crossing the border freely has been lost.

Following the United States announcement, W. E. Ditchburn, Indian commissioner, wired Ottawa, and pointed out how serious the embargo would be on the northbound traffic.

Mr. Haultain's suggestion and the resolution to be taken in Ottawa and representations made to Washington.

New Grain Inspection District

Moos Jaw To Be Made A Grading Point This Fall

The Federal Government intended to create a new grain inspection district at Moos Jaw.

Mr. Haultain has complete confidence in the feasibility of the scheme and maintains that the northbound traffic would ultimately become the mecca of sport lovers and attract more tourists to the great adventure of the Canadian National Railways.

The line could be placed in the railway producing class as the "World's Most Unique Motor Highway," he contended. Mr. Haultain proposes to submit his idea to the railway authorities.

An Ambitious Mushroom

A mushroom with a yearning for the sunlight has proved itself to be a success in the growing of concrete walls on independent farms. A few days later the surface of the wall would be broken to reveal a mushroom, about one-half inch in diameter, which had crept its way up through two inches of solid concrete.

Mushrooms are what they build in a new home, excepting instead of earth, they build their houses and they never leave their bushes.

The income tax has been abolished in Saskatchewan.

Administering the Law in the Northern Parts of Canada

George P. MacKenzie, formerly gold commissioner in the Yukon Territory, will be in charge of the party going to the north under the direction of the department of the interior on board the Arctic.

The Arctic will pay the usual visits to the northern outposts, and will carry a force of 100 men to relieve those which have been in the north since last year.

The department will continue to carry on the work of administration of the northern islands, and a new post will probably be established on Elliston Island.

For Fish Culture

Federal Government Votes Money For Fish Propagation

A vote of \$376,000 for fish culture was carried in the House of Commons.

In addition to a number of other items, \$100,000 for the building of hatcheries, \$25,000 in the conservation and development of deep sea fisheries, \$2,000 for the maintenance of fisheries intelligence bureau, and \$10,000 to provide for investigations into practical and economic problems connected with fisheries.

Nothing Coming To Him

A negro received a pistol and a revolver, and a negro neighbor who soon was to be married.

The negro, who had been a cook, was to be married.

"Well, son, Sam, have you harvested the crops?"

"Well, wasn't I to get one-fourth?"

"Yes, boss, that's the truth, but there wasn't no fourth."

"D—You was three, Sam, and you was mine."

Farmers To Benefit

Ontario farmers benefit to the amount of about \$42,500 annually through the reduction of the interest rate on farm loans from a 6 to 7½ per cent. rate now in effect.

Farm loans are affected to the amount of \$5,000,000.

CAPTAIN BLOOD: A Vitagraph picture with J. Warren Kerrigan
in the title role, in an adaptation of this thrilling novel.

CHAPTER XXIII.—Continued.

"Perhaps it will be best," M. de Bharon said, "to point out that I have to observe that M. de Cussy has been most instrumental in admitting you to one-half of the prizes taken."

"It is a master between yourself and M. de Cussy, my general?"

"Oh, no! It is a master between myself and you."

"Your pardon, my general. The articles are signed. So far as we are concerned, the master is clear."

"I am not so blind," M. de Bharon said, "I suppose that we cannot award you more than one-twentieth share."

"You are quite certain of that, M. de Bharon? That you cannot?"

"I am quite certain that I will not."

"In that case," said Blood, "it but requires me to present my little account of the matter to you, and to fix the sum at which we should be compensated for our loss of time and disengagement in coming hither. That settled, we can part friends, M. de Bharon."

"It is but the devil that makes me!"

"It is but the fact that I am obscure."

"My French, perhaps, is not of the best—"

"To your French is almost enough to put me at a loss if I may permit myself the observation. Now, look you here, M. le Filibuster, you have accepted service of the King of France, you and your men. The draft of the King of France is to be paid. You are not to conceive, however, as you appear to be doing, my allies in the enterprises I have in view, but my subordinates. In you I behold a comrade who leads you, not a companion or an equal."

"Oh, be sure that I understand," Captain Blood laughed. "He was receiving his normal self, I am sure."

The only thing that marred his enjoyment was the reflection that he had not shaved. "I forgot nothing, I assure you, my general. I do not forget to shave you, you see."

He was about to say something else, when he saw that the articles he signed are the condition of our service; and the articles provide that we receive one-fifth share. "Please you that, and you cancel the articles; cancel the articles, and you receive one-fifth with them. From that moment we cease to have the honor to hold rank in the navy of the King of France."

Captain Blood rose, his officer's page with him. Captain Blood bowed.

"M. de Bharon?" said he.

"You shall be advised of my response," M. de Bharon retorted.

NERVOUS
BREAK-DOWN

Pains in Back and Legs Relieved by Lydia E. Pinkham's Vegetable Compound

Front, Ontario—"I had a nervous break-down, as it is called, with severe pains in my back and legs, and with fainting spells. I had to give up work. I was nervous and could not sleep nor eat as I should and spent most time in bed. I had to give up work for a month, for over two years before Lydia E. Pinkham's Vegetable Compound was recommended to me by a doctor. Before I had taken five doses I was asthmatic, but the compound had the both wind taken out of bed and able to walk around the house. During my convalescence I had to give up work, some time to look after my home for me, but then to the Vegetable Compound I am now able to go about again. After taking Lydia E. Pinkham's Blood Medicine in turn with the Vegetable Compound, I am now able to take these medicines to any one who is not responding to the Vegetable Compound for you to use these facts as a testimonial." Mrs. J. SEPPHUR, 129 Joss Avenue, Frontenac, Ontario.

Nervousness, irritability, painful feelings, run-down feelings and weakness are all symptoms of nervousness. Suffering from these troubles, which they so often have, should give Lydia E. Pinkham's Vegetable Compound a trial. All druggists sell this medicine.

W. N. U. 1551

That rescue proved to Captain Blood's way next official business. He brought two together. Wolf was the cause of Captain Blood's hunting and with the admiral while he sat dinner. The Old Wolf had returned with his ready fat a mocking Frenchman's remarks and had been fain in jail. M. de Bharon had his visitor be admitted.

There was a short time later when

Captain Blood professed astigmatism. Sourly invited by M. de Bharon to state his grounds for it, he did so with the most frankness.

"You know that I am to sail

across the Caribbean on an adventurous expedition, neglecting that which lies here at our very door. In our case a Spanish invasion of French Hispaniola is imminent. If we do not by reducing the Spaniards here, that possibility will be removed. We shall have added to the crown of France the most coveted possession in the Indies."

Captain Blood laughed outright.

He had suddenly read the Baron's mind.

M. de Bharon, intrigued by his mirth, spoke upon him disapprovingly.

"I am not a fool, monsieur."

"Because I discovered here an irony

that is supremely droll. You, M. le Baron, General of the King's Armies by Land and Sea in America, propose to intercept a pirate because you are chary, while I am buccaneer, am urging this more than is done with upholding the honor of France. You perceive how droll it is."

"I am a buccaneer," cried Bharon in a thick voice.

"The devil take me!"

"I am a superior officer!" cried Bharon.

"You are just a common pirate! M. le Baron, I have the honor to wish you good-day."

He stalked out, and his three captains, although they thought him mad—rolled after him in loyalty.

Nevertheless, it was to Captain Blood that the buccaneer contingent was added.

Volunteers and negroes had

brought up the forces directly under M. de Bharon to twelve hundred men.

With these he thought he could keep the buccaneer contingent in order and submissive.

They made up an imposing fleet, led

by M. de Bharon's flagship, the Victoria, a mighty vessel of eighty guns, and the most powerful of all the ships was as powerful as Blood's Aranella, which was of forty guns.

Followed the lesser buccaneers, Lorraine, Elizabeth, Lachesis, and Aranea, and a dozen galagos built with stones, bushes and canes small craft in tow.

That you confirm or that you repudiate them?"

"I have considered that, too," he answered. "And I have the opinion remains unaltered. I must confess that since M. de Cussy has pledged me, it is for us to fulfill the pledges. The articles are confirmed, sir."

Blood and his officers were summoned a week later to a council which sat to determine their operations against Spain. M. de Bharon told before them a project for a raid upon the provincial town of Cartagena, which was the chief port.

Captain Blood professed astigmatism.

Sourly invited by M. de Bharon to state his grounds for it, he did so with the most frankness.

"You know that I am to sail

across the Caribbean on an adventurous expedition, neglecting that which lies here at our very door. In our case a Spanish invasion of French Hispaniola is imminent. If we do not by reducing the Spaniards here, that possibility will be removed. We shall have added to the crown of France the most coveted possession in the Indies."

"You know that I am to sail

across the Caribbean on an adventurous expedition, neglecting that which lies here at our very door. In our case a Spanish invasion of French Hispaniola is imminent. If we do not by reducing the Spaniards here, that possibility will be removed. We shall have added to the crown of France the most coveted possession in the Indies."

Captain Blood laughed outright.

He had suddenly read the Baron's mind.

M. de Bharon, intrigued by his mirth, spoke upon him disapprovingly.

"I am not a fool, monsieur."

"Because I discovered here an irony

that is supremely droll. You, M. le Baron, General of the King's Armies by Land and Sea in America, propose to intercept a pirate because you are chary, while I am buccaneer, am urging this more than is done with upholding the honor of France. You perceive how droll it is."

"I am a buccaneer," cried Bharon in a thick voice.

"The devil take me!"

"You are just a common pirate! M. le Baron, I have the
